

Case Study: FMCG

RECKITT UTILIZES FLEET CLOUD TO AUTOMATE SAFETY INSPECTIONS

CHALLENGE

About 45 paper safety inspections had to be collected, validated and filed per shift. This took about 7 hours per week. Multiplied out at 52 weeks per year, this used up 364 administrative hours.

SOLUTION

Kenco installed Fleet Cloud on all their lifts which automated inspections, doing away with paper inspections.

RESULTS

The site Safety Manager estimated that the automated electronic inspections save him and his team approximately 6-8 hours a week in administrative tasks.

6-8 Hours/Week
ADMINISTRATIVE TIME SAVED
WITH AUTOMATED INSPECTIONS
